

Working at FTE automotive

FTE automotive fosters a corporate culture in which people are fully committing to achieve mutual goals. Appreciation and respect are the guiding principles of our working world.

Ongoing education and further training ensure that our employees are able to reach their full potential, integrate and expand their areas of expertise and boost innovation.

Our responsibility

As a global supplier of the automotive industry, we aim to ensure successful and sustainable corporate development.

Environmental protection and responsible use of natural resources are an essential part of the corporate philosophy of FTE automotive.

It is our responsibility to comply with established law. The well-being of our employees and their families deserve our special attention. We encourage open and fair cooperation – both within the company and in collaboration with our partners – and appreciate the diversity of different cultures.

History

Over 70 years of experience for our customers.

- 2016 PACE Award (lubrication oil pump)
- 2015 PACE Award (shift actuator module)
- 2014 Acquisition of brake caliper business from SBS
- 2014 Start of series production of components for dual clutch transmissions
- 2011 Foundation of the Joint Venture SFMC, in Prešov (Slovakia)
- 2010 Foundation of a new plant in Mauá (Brazil)
- 2009 Foundation of a new plant in Taicang (China)
- 2005 Foundation of a new plant in Podbořany (CZ)
- 2004 Foundation of a new plant in Prešov (Slovakia)
- 2004 Acquisition of the company Automotive Products, Auburn Hills (USA)
- 2003 Foundation of the Joint Venture „APG-FTE automotive“ in Hangzhou (China)
- 1999 Foundation of a new plant in Ebern-Fischbach (Bavaria, Germany)
- 1998 Establishment of a production facility in Brazil
- 1997 Foundation of the first international plant in Puebla (Mexico)
- 1992 Foundation of a new plant in Mühlhausen (Thuringia, Germany)
- 1988 Development of an Anti-locking Brake System (ABS) for motorcycles
- 1970 Start of series production of clutch cylinders
- 1954 First delivery of a brake hydraulics unit
- 1943 Foundation of a new plant in Ebern (Germany)

FTE automotive – Innovation drives

Figures. Data. Facts.

2016

A reliable partner

The FTE automotive Group is your competent partner in the sector of development and production of drivetrain and brake system applications for the automotive industry. The company is located in all important continents, one of the leading OE-suppliers and a reliable partner for the car and commercial vehicle spare parts market. The FTE Group employs 3,800 people worldwide. In 2015, the company generated a turnover of approx. EUR 505 million.

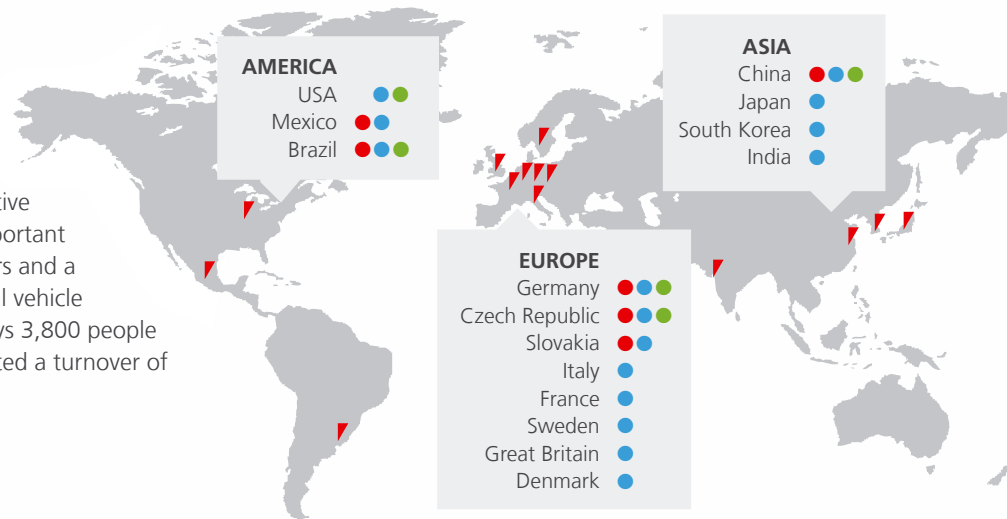

Core competences

FTE automotive engineers develop innovative products for drivetrain and braking systems, designed in partnership with the leading research and development centers of the automotive world. In our laboratories, our products for passenger cars and commercial vehicles are tested for precision, safety, durability, and comfort. They are always manufactured in compliance with all environmental protection standards.

Development and Production of

- electrohydraulic applications, including sensors/software engineering
- mechatronic applications
- plastic and aluminum housings
- seals, rubber parts and hoses

FTE automotive has nine production sites and numerous technical support offices worldwide.

Products

Components for Transmission and Powertrain

Electro-hydraulic actuators, gear shift actuator modules, electric oil pumps, dual concentric slave cylinders, hydraulics for automatic transmissions (ATM) and dual clutch transmissions (DCT)

Clutch Hydraulics

Clutch master cylinders, clutch pipe assemblies, oscillation dampers, clutch slave cylinders, concentric slave cylinders, clutch boosters

Sensors for

Clutch, braking and transmission applications

Brake Hydraulics

Brake boosters, drum brakes, wheel cylinders, brake hoses, brake pipe assemblies

Remanufacturing

Brake caliper
